

# Scripting Life

Ryan Dickherber

Jan. 18, 2008

I was about to manually count the number of audio files I have that are over a certain bitrate, when it occurred to me that I could write a script to do that. Then I started to realize that many things in my life I do by hand could be done by scripts, so I started writing scripts for all of them.

Now I don't have to do anything but debug scripts, which only takes a little bit longer than doing things by hand.
